Subject: Oxbow Hill Solar Project

As we are pulling together our State Permit Application, we have begun reviewing all our field data and surveys. To this end, there are some areas where we need to go in the field and verify our wetland delineations, and in some cases expand on the study areas. We will have field crews in the Town of Fenner carrying out this activity the week of August 28, 2023. They will be working on parcels included in the Project Area, where we have the right to access from the landowners.

Please let me know if you have any questions.

Thank you.

Keith
